

LEGS ON WHEELS

A post-pandemic alternative rock virus from Manchester, likened to Black Midi, Cardiacs, and Frank Zappa.

Legs On Wheels have been featured on BBC 6 Music and Radio XS and were made New Band Of The Day on Louder Than War, alongside a glowing review of their debut EP **Idelia**.

Their debut album **LEGROOM** is an extravagant feast for the ears.

"It is a multi-coloured, multi-faceted, proggy, psychee dream of an album...You need LEGROOM in your life. Period."

Weirdo Shrine

"It steps into many directions: psych, jazz, pop rock, space rock and even a venture into punk...An album to be listened to in its entirety that underlines the sheer wonder of Prog"

I Don't Hear A Single

"Such great time signatures and guitar work all over it...Psychedelic and outside the box with some great mathy undertones"
